

## Our Principles

These are our principles for science at West Cliff school.

We will see these across the school in our learning.

- Wherever possible our science learning will be hands on.
- We will learn outside as well as inside the classroom.
- We can make links between science in school and the world around us.
- We can create, plan and carry out our own scientific enquiries safely.
- We are confident to ask questions and make mistakes because that's where learning happens.
